Meeting Minutes

3 January 2013

Present: Dave Alcox, Rosie Deloge, Tim Finan, Andrew Jeffery, Joe Kasper, Mike McInerney, Tom Schmidt

Absent: Len Mannino

Guests:

Call to Order:

Meeting called to order 6:00 PM

Minutes approved.

Discussed feasibility and cost of using wireless technology to provide live coverage of soccer and athletic field events. Conclusion is that folks interested in the event will attend in person if at all possible and those who can't are not typically in a position to watch the event live. Very little benefit in live vs. recorded coverage. Mike will continue to investigate source of the cable failure preventing live coverage of athletic field events to determine if it is cost effective to repair.

Third PEG channel still not activated. Mike is also working with Comcast about direct fiber link between high school and town hall. Mike will try to schedule Bryan Christiansen, Comcast Government Affairs manager, to discuss options at our next meeting and also invite Bruce Dickerson Milford IT department Director.

GTM will begin covering Rec Committee meetings after the Town and School Deliberative sessions.

Looks like Ambulance Cam is a go. Camera will provide both real time and time lapse view of ambulance building construction. Mike is working with Eric Schelberg Ambulance Director they have tentative agreement from Robbins Auto Parts to locate the camera. Going forward GTM intends to set up similar systems at all town building projects.

Mike is working with an audio consultant to improve sound quality at town hall and high school meetings. He purchased a gooseneck adapter that should make public microphone usage easier. During the deliberative session will use two wireless mics; one for the moderator and a second for any guest speakers.

Coverage of Town budget committee going well, Mike is having difficulty getting meeting schedule from the School budget committee.

Mike is having difficulty getting the source material for edits to the new logo, may need to be recreate it from scratch.

Mike worked with G4 Communication to modify DNS records so ambulance web page subdomains work correctly when accessed from the town web site.

Dave Alcox is working to get students to create more content and the “We the People” project.

Upcoming Meeting:

28 Feb 2013 Board of Selectmen meeting room

Adjourn:

Meeting adjourned 7:10 PM

Respectfully submitted: Tom Schmidt
