NFPA 54/ANSI Z223.1 - National Fuel Gas Code - 2018 Edition

5.1 Piping Plan.

5.1.1 Installation of Piping System. Where required by the authority having jurisdiction, a piping sketch or plan shall be prepared before proceeding with the installation. This plan shall show the proposed location of piping, the size of different branches, the various load demands, and the location of the point of delivery.

5.1.2 Addition to Existing System.

5.1.2.1 When additional appliances are being connected to a gas piping system, the existing piping shall be checked to determine whether it has adequate capacity. If inadequate, the existing system shall be enlarged as required, or separate gas piping of adequate capacity shall be provided.

The following methods can be used while mapping piping systems:

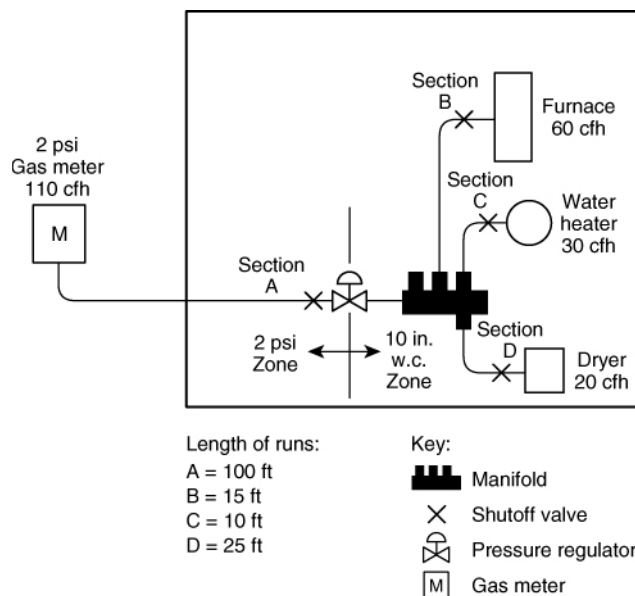

The Longest Length Method

The Branch Length Method

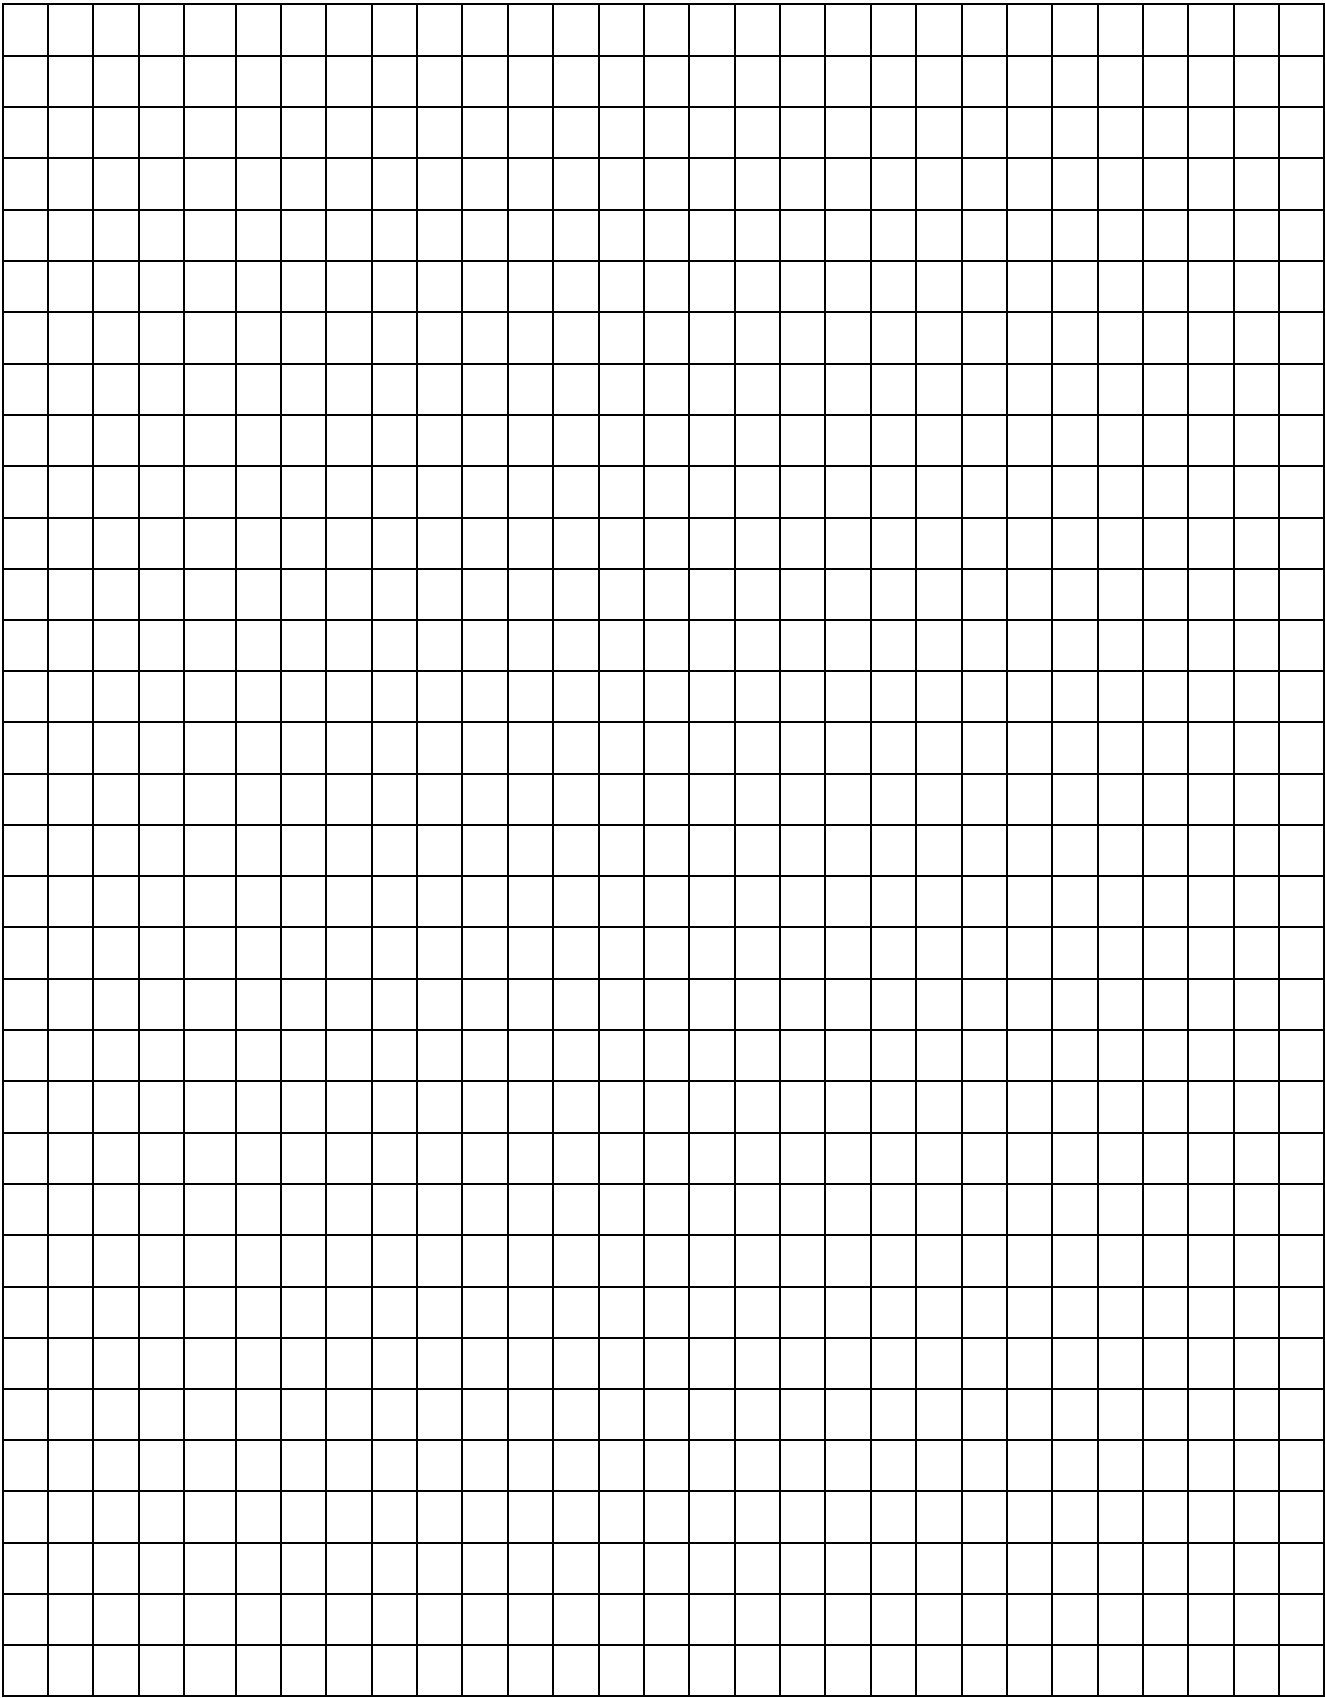

Hybrid Pressure Method

Pressure Drop per 100 ft Method

Example of Map and Design:

1 square = 1 foot

Milford Fire Department Fee Schedule
