

# **Milford Community Athletic Association**

## **Needs Analysis**

### **MCAA Brox Property Project**

## Mission Statement

The purpose of the MCAA is to provide Milford area youth with athletic activities which will promote sound bodies, keen minds, positive competitive attitudes, and the spirit of teamwork. The MCAA has not increased its footprint in the last 25 years. During that time we have increased our enrollment and exceeded our field capacity. The land at the Brox Property that has been identified for recreation by the Brox Property Community Master Plan. The mission of this project is to develop the Brox Property for recreational use by the MCAA.

## What is a Need Analysis?

An important getting Started step is analyzing the specific needs for outdoor MCAA sports teams. These will be the hard numbers that will give fuel to the case for a field project and serve as the foundation of much of our planning, fundraising, site selection, design and construction. We will consider both current needs and our needs over time. The purpose of this document is to understand the current field usage in the town of Milford of the facilities that are used or can be used by the MCAA outside sports teams. We then estimate the future needs of these sports and determine if there are underutilized or alternative locations available. We understand that developing the Brox property would be a large undertaking and would only want to do that if all other alternatives have been exhausted.

## School Enrollment Projections

The current estimated population for the Town of Milford in 15,200. According to the 2010 census 22.2% of the population was under the age of 18. This would indicate there are approximately 3375 residents under the age of 18. In order to determine the growth in population we have been provided (below) the Milford School department enrollment projections through 2023. These indicate that the school enrollment will remain at its current levels for the next 10 years.

Milford Enrollment Projections - Updated 10/10/2012

|          | Milford School District - Actual |       |       |       |       |       | Milford School District - Projection |       |       |       |       |       |       |       |       |       |

- Notes:
1. Actual figures from Superintendent's office as of 10/1 of each year
  2. Milford enrollments and Mason enrollments were forecasted separately, then added together to get total forecast.
  3. K projections are based on average of previous 3 years
  4. Readiness eliminated for future years.
  5. Grade 1 projections based on cohort survival rates for prior 3 years, including R
  6. Grade 2-12 projections based on cohort survival rates for prior 3 years
  7. P held at 22; this is the average for 09/10 to 12/13
  8. Other HS includes adult, exchange, and part-time (ATC, home-school) students. It is held constant at 25 based on existing enrollments.
  9. Mason K enrollments arbitrarily ramp slightly upward from current levels (from 12 per year to 13 per year in 17/18)

## Historical Demographics

Population change for Milford totaled 10,289 over 51 years, from 4,863 in 1960 to 15,152 in 2011. The largest decennial percent change was 36 percent between 1960 and 1970, and also between 1980 and 1990; population increased 31 percent between 1970 and 1980. The 2011 Census estimate for Milford was 15,152 residents, which ranked 17th among New Hampshire's incorporated cities and towns.

The school projections for enrollment stay flat over the next 10 years. If we look back at each decade from 1970 through 2010 you can see the historical increase in population. On average from 1970 through 1990 the population increased between 31% and 36%. In that last two decades the growth has been more modest at 15% and 11% respectively. The average increase per decade since 1970 has been 26%. If growth was to return to the same level as the past two decades we would see an increase of approximately 500-600 kids per decade.

| Year | Population | Increase | % Increase | Avg & Increase | Under 18 | Increase in Kids |
|------|------------|----------|------------|----------------|----------|------------------|
| 1960 | 4863       |          |            |                |          |                  |
| 1970 | 6622       | 1759     | 36%        |                |          |                  |
| 1980 | 8685       | 2063     | 31%        |                |          |                  |
| 1990 | 11828      | 3143     | 36%        |                |          |                  |
| 2000 | 13,606     | 1778     | 15%        |                |          |                  |
| 2010 | 15,115     | 1509     | 11%        | 26%            |          |                  |
| 2020 | 17,382     | 2,267    | 15%        |                | 23%      | 521              |
| 2030 | 19,990     | 2,607    | 15%        |                | 23%      | 600              |

## Current MCAA Enrollment

According to registration data from within Sports Pilot there were 1237 kids enrolled in Baseball, Softball and Soccer.

| 2012 Season | Enrollment |
|-------------|------------|
| Spring      | 612        |
| Fall        | 625        |
| Total       | 1,237      |

In 2012 soccer had the highest percentage of participation followed by baseball and then softball.

| Sport    | Enrollment | Percent |
|----------|------------|---------|
| Baseball | 405        | 33%     |
| Softball | 152        | 12%     |
| Soccer   | 680        | 55%     |
| Total    | 1,237      |         |

Below is the breakdown of total enrollment for each sport in each season.

| Season | Sport    | Enrollment |
|--------|----------|------------|
| Spring | Baseball | 370        |
| Spring | Softball | 104        |
| Spring | Soccer   | 138        |
| Fall   | Baseball | 35         |
| Fall   | Softball | 48         |
| Fall   | Soccer   | 542        |
|        |          | 1,237      |

When looking at individual sports we currently only have enrollment numbers for soccer. When the MCAA implemented its new registration database Sports Pilot almost all of registration information was lost. Over the past five years the soccer program has increased its enrollment by 45%.

| Year | Season | Enrollment | Increase | Total Pc |
|------|--------|------------|----------|----------|
| 2008 | Fall   | 300        |          |          |
| 2009 | Fall   | 390        | 90       |          |
| 2010 | Fall   | 500        | 110      |          |
| 2011 | Fall   | 510        | 10       |          |
| 2012 | Fall   | 542        | 32       | 45%      |

Note: We do not include camps, clinic and drop-in sports, only the fall and spring seasons where field space is at a premium.

## Facilities and Fields

The next section give an overview of each field the MCAA currently plays on or could play on. The colored lines will give you an idea of the fields that are currently on each facility. In many cases we are using the same facility to host multiple sports. The colored lines help illustrate that at many facilities while they can support multiple sports that cannot do so simultaneously.

### North River Road – MCAA Complex

### Keyes Park

**Kaley Park**

**Shepard's Park**

## Adams Park

## Jacques Elementary

## Heron Pond

## Middle/High School

**Carnival Hill Fields – Wilton NH**

**Goss Park, Wilton NH**

## Field Usage Data Availability

Use of the fields in Milford is controlled by the Schools, Recreation Department and MCAA. There is no central database that contained all of the field usage, the usage data is fragmented across a few systems. The recreation department has quite a good database of usage information and provided it to this effort. The MCAA recently switched to a new system to track registration and scheduling but did not move historical data into this system. Much of the MCAA usage was gathered through meetings. We received email feedback from the school, there doesn't seem to be a system to track usage of school fields.

## Detailed Usage by Field

With input from the Rec Department, MCAA, High School and Middle School we have compiled a detailed database of field usage in the town. In this section we will provide a breakdown by facility and field. In order to make this easier to understand we have made the following assumptions:

- (1) In order to be included as activity the sport had to run for at least a few weeks. This means that our overall usage numbers are lower than they really are, but only by a small amount.
- (2) All numbers are historical from 2012. One exception to this is we have allocated use to Jacques field for HS and JV field hockey in fall of 2013. We are also moving the adult recreation usage from the Police station field to a new proposed softball field on Kaley Park.

## Methodology

In order to evaluate our field needs we need to compare the current usage to what 'normal' baseline usage should be. If we evaluate the actual to baseline we can develop a percentage that compares the two. A 100% usage would indicate that a field is being used to the baseline. A usage lower than 100% would indicate that the field has availability. A number greater than 100% would indicate a field is being used more than it should be. The benefit of this approach is that we can adjust the baseline if necessary during the analysis to allow for specific factors.

## Baseline Calculation

- (1) The fields are not used during winter and a lesser amount of use in July and August. We calculate that over the course of April, May, June, Sept, and October there are an additional 15 days over the four weeks in each month. This would approximate a value of 4.5 weeks per month.
- (2) We only include the months of April, May, June, Sept and October at 100%. The months of July and August are calculated at 50% usage or approximately 2 weeks per month.
- (3) We only include the days of Monday, Tuesday, Wednesday and Thursday at four hours per day.
- (4) We only include the day of Friday at 2 hours; typically weekend evenings are not used for sports with a few exceptions.
- (5) The day of Saturday is included at 8 hours.
- (6) The day of Sunday is included at 4 hours.
- (7) The maximum use of a field per week is 30 hours.
- (8) The total for April, May, June, Sept and October is 22.5 weeks.
- (9) The total for July and August is 4 weeks.
- (10) The total week's usage of the fields from April thru October is 26.5 weeks.
- (11) A single field 100% usage is the 26.5 weeks of usage at 30 hours per week, a total of 795 hours.
- (12) A single field 100% usage during the week is 26.5 weeks at 18 hours per week, at total of 477 hours.
- (13) A single field 100% usage on the weekend is 26.5 weeks at 12 hours per week, at total of 318 hours.

## Usage Data Collection

- (1) Detailed information was collected at the month and day level of granularity. Based upon this format we need to multiply the collected actual information by the 4.5 weeks per month to get the actual hours.
- (2) We have many fields that are used to host different sports with different sized fields on the same facility. An example of this would be the North River Road facility that is used for baseball in the spring and soccer in the fall. When soccer is using the grass outfields you cannot play baseball and when baseball is playing you can't play soccer. If we were to break down this facility by the 11+ fields used by each sport it would appear underutilized when that is not the case. **For this reason we will not identify fields at a more granular level than the sport with the largest usage footprint.** In the case of the MCAA fields at North River Road we will only break down usage to the Perham, Kaley and York level.
- (3) We not only need to account for the usage of a field, but also the concentration of people on each field. If we have three kids playing in a baseball outfield, that is a different usage than 22 kids playing a soccer game. For the most part the outside fields have the same number of kids per team, so the concentration should be consistent. There are some cases where we have younger kids, playing on smaller fields that are closer together which increases the concentration. In those cases since these smaller fields are not the largest usage footprint there usage would be summarized. If we have three soccer fields playing on one outfield then we would show three times the usage.

### Summary Results 1 - Total Hours by Facility and Field, Ordered by Total Percentage

| Facility               | Field             | Total_Hrs | Week_Hrs | Weekend_Hrs | Total_Pct | Week_Pct | Weekend_Pct |
|------------------------|-------------------|-----------|----------|-------------|-----------|----------|-------------|
| North River Road       | Perham Field      | 1302      | 768      | 534         | 169%      | 168%     | 170%        |
| North River Road       | Kaley Field       | 1015      | 682      | 333         | 132%      | 148%     | 107%        |

## **External Risks**

We have identified a number of external risks that exist impact the current field usage, they are as follows:

- Keyes Field, North River Road and Kaley Park are located in areas that are prone to flooding.
- Future dredging of Osgood Pond would impact the use of Adams Park.
- Increased EPA activity at Keyes Field will directly impact that facility now!
