

## NOTICE

The Transfer Station will begin on Tuesday March 24, 2020 with a transition to limited recyclable materials. With the COVID-19, the protection of town employees and prevention of contagion is essential for the town to limit everyone's exposure.

**Bulky items, propane tanks, batteries, tires, appliances and demo will still be accepted as normal. Please process through the Transfer Station office.**

**All other materials will go directly into the hopper. All trash, glass, cans, plastic, cardboard and paper.**

We ask you to work with us during these challenging times and keep watch to see when we can return to back to our recycling programs.
